

1. Personal Information				基本情報
Hosnain Rafi	+8801754659997	rhosnain@gmail.com	github.com/HosnainRafi linkedin.com/in/hosnain-rafi1 Live Portfolio Website	
Name (氏名)	Phone (電話番号)	Email (メール)	GitHub & Portfolio (ポートフォリオ)	
2001-Dec-15	Bangladeshi	Married	Male / Islam	
DOB (生年月日)	Nationality (国籍)	Marital Status (婚姻状況)	Gender / Religion	Photograph (写真)
2. Educational Background				学歴
Institution Name, Address of Institute (教育機関名・所在地)	Duration (期間)	Department (学部・学科)	Major & Degree (専攻・学位)	
Mawlana Bhashani Science and Technology University, Tangail, Bangladesh.	4 Years 2019 – 2023	Information and Communication Technology	B.Sc. (Engineering) in ICT (4-Year Full-Time Degree, CGPA: 3.75)	
Dr. Mahbubur Rahman Mollah College, Jatrabari, Dhaka, Bangladesh.	2 Years 2017 – 2019	Higher Secondary Certificate (HSC)	Science	
IET Govt. High School, Narayanganj, Bangladesh.	2 Years 2015 – 2017	Secondary School Certificate (SSC)	Science	
3. Strengths & Self-PR				強み・自己PR
• 4+ Years of Professional Engineering Experience: Solid hands-on background architecting, developing, and shipping enterprise web solutions across MERN (MongoDB, Express, React, Node.js) and Angular / TypeScript ecosystems.				
• Japanese Work Culture & Business Etiquette (報連相 / チームワーク): Deep respect for Japanese corporate communication principles (Hou-Ren-So: Report, Contact, Consult), high discipline, punctuality, ownership, and continuous Kaizen (改善) improvement. Currently preparing for the JLPT N5 examination (creator of Katakana Gym).				
• Global Remote Collaboration: 4+ years collaborating daily with distributed European teams (Mortgage Magic Ltd, London, UK), aligning delivery across time zones and technical/business requirements.				
• Robust Web Services & Microservices: Extensive experience engineering high-throughput RESTful APIs, modular microservices, WebSockets, and real-time WebRTC audio/video communication.				
• Clean Architecture & SOLID Design Patterns: Expert in Object-Oriented Programming (OOP), MVC, Repository Pattern, and Clean Code practices ensuring maintainable, low-technical-debt codebases.				
• Modern Frontend Proficiency: In-depth expertise in React 19, Angular, TypeScript, Next.js, Vue.js, Redux Toolkit, Pinia, Tailwind CSS, and responsive UI components adhering to strict accessibility standards.				
• Quality-First Engineering & Testing Automation (品質第一): Strong practitioner of Playwright E2E testing, Jest unit testing, Postman API verification, and deterministic DOM assertion pipelines.				
• Agentic AI & LLM Systems: Hands-on production experience integrating OpenAI API, Claude 3.5 Sonnet Vision, multi-agent orchestration swarms, and intelligent RAG workflows.				
• Database Mastery (RDBMS & NoSQL): Proficient in relational schema design, indexing, and query optimization on PostgreSQL & MySQL, as well as scalable NoSQL schemas on MongoDB and Redis caching.				
• DevOps, Docker & Cloud Infrastructure: Practical experience containerizing multi-tier applications with Docker, managing Linux (Ubuntu/CentOS) cloud servers, and automating CI/CD pipelines.				
• Enterprise Backend Integration: Backend exposure and working familiarity with C#, ASP.NET Core (.NET), and Frappe ERP Healthcare module integration.				

- **Version Control & Collaborative Code Review:** Strict adherence to Git/GitHub workflows, trunk-based/feature-branch development, atomic commits, and meticulous pull-request code reviews.
- **Agile / Scrum Delivery:** Experienced in 2-week sprint cadences, backlog grooming, story estimation, daily standups, and sprint retrospectives using Jira and ClickUp.
- **Analytical & High-Pressure Execution:** Proven track record of debugging complex cross-layer issues, meeting strict release deadlines, and maintaining high software availability.

4. Work Experience				職務経歴
Organization Name, Address (企業名・所在地)	Duration (期間) (mm/yyyy – mm/yyyy)	Job Title (役職・役割)	Technology Used (使用技術・環境)	Responsibilities Includes (担当業務・実績)
Mortgage Magic Ltd. London, United Kingdom (Remote UK / European Engineering Team)	07/2024 – present 現職	Full-Stack Software Engineer (Feature Lead)	Angular, TypeScript, Node.js, Express, RESTful APIs, PostgreSQL, MongoDB, Socket.IO, Docker, Git/GitHub, Agile/Scrum, C#/ASP.NET	• Architecting and developing core modules for an enterprise UK mortgage origination SaaS and financial CRM. • Leading feature engineering teams, translating business rules into scalable technical designs under Agile/Scrum. • Designing and consuming secure RESTful APIs applying OOP, SOLID principles, and schema validations. • Building reactive Angular/TypeScript components integrated with real-time backend microservices. • Developing automated lender criteria scrapers and ETL pipelines (Python, TypeScript). • Conducting structured code reviews and mentoring developers to uphold high code quality. • Ensuring 99.9% operational availability and production support.
Mortgage Magic Ltd. London, United Kingdom (Remote UK / European Engineering Team)	09/2022 – 06/2024	Software Engineer	Angular, TypeScript, JavaScript (ES6+), Node.js, Express, PostgreSQL, MongoDB, Git, Jira, RESTful APIs	• Developed scalable Angular and TypeScript UI components for applicant onboarding and document verification. • Built and maintained Node.js/Express API endpoints, reducing average response latency by 25%. • Debugged complex frontend/backend issues, improving platform stability and client satisfaction. • Maintained clean version-controlled codebases using Git/GitHub with thorough documentation. • Participated in sprint estimation, daily standups, and retrospective meetings.

7. Project History (Part 1: Enterprise, Agentic AI & Core Web Systems)							プロジェクト経歴 (その1)
Begin/End (mm/yyyy)	Duration	Project Name & Description (プロジェクト名・概要)	*Process (担当工程)	Technology / Language Used (使用言語・FW・ツール)	OS / DB	Job Title (役割)	Team
09/2022 – continue	Ongoing (48 Mos)	Mortgage Origination & CRM Platform Enterprise SaaS managing end-to-end UK loan origination, document verification, broker portals, and real-time interest pipelines.  Enterprise SaaS (Mortgage Magic Ltd)	1, 2, 3, 4, q1	Angular, TypeScript, Node.js, Express, REST APIs, Socket.IO, Docker	Linux, Windows, PostgreSQL	Full-Stack Software Engineer	6
08/2026 – continue	Ongoing	DesignGate — Agentic UI Quality Gate Automated UI quality gate with Playwright headless evidence capture, deterministic DOM assertions, and Claude 3.5 AI vision grading for zero-regression frontend delivery.  GitHub Repo  Live Demo github.com/HosnainRafi/designgate	1, 2, 3, 4, q1, q2, q3, q4	TypeScript, Playwright, Claude Vision API, Node.js, Jest	Linux, Windows, SQLite	Full-Stack Software Engineer	1
08/2026 – continue	Ongoing	Agent-Swarm — Multi-Agent Swarm Orchestrator Universal multi-agent swarm orchestrator coordinating CLI coding assistants (Claude Code, Codex, Gemini) for parallel development workflows without extra API cost.  GitHub Repo github.com/HosnainRafi/agent-swarm	1, 2, 3, 4, q1	JavaScript, Node.js, Multi-Agent Architecture, CLI, Subagents	Linux, Windows	Full-Stack Software Engineer	1
08/2026	1 Month	UK Mortgage Lender Data Scraper & Parser Automated data extractor and criteria tracking engine parsing interest rates, criteria, and loan limits across 20+ UK mortgage lenders for financial advisors.  GitHub Repo github.com/HosnainRafi/mortgage-scraper	1, 2, 3, 4, q1	Python, BeautifulSoup, TypeScript, Node.js, Data Pipelines	Linux, Windows	Full-Stack Software Engineer	1
08/2025 – 09/2025	2 Months	Urban Grill — Full-Stack Restaurant Management Dual customer ordering + kitchen admin system featuring real-time Socket.IO status updates, Stripe payment, and role-based access control.  Live Site  Frontend Repo  Backend Repo urban-grill.vercel.app	1, 2, 3, 4, q1	React 19, TypeScript, Node.js, Express, Socket.IO, Stripe, Firebase Auth	Linux, Windows, MongoDB	Full-Stack Software Engineer	2
06/2025 – 08/2025	3 Months	Doctors BD — Telemedicine & AI Appointment Comprehensive healthcare web application with WebRTC video consults, SSLCommerz gateway, and Claude AI symptom classification for clinical routing.  Live Site  Frontend Repo  Backend Repo doctors-bd-frontend.vercel.app	1, 2, 3, 4, q1	React, Node.js, Express, MongoDB, WebRTC, Claude AI, SSLCommerz	Linux, Windows, MongoDB	Full-Stack Software Engineer	2

7. Project History (Part 2: Specialized Portals, Middleware & Architecture)							プロジェクト経歴 (その2)
Begin/End (mm/yyyy)	Duration	Project Name & Description (プロジェクト名・概要)	*Process (担当工程)	Technology / Language Used (使用言語・FW・ツール)	OS / DB	Job Title (役割)	Team
03/2025 – 06/2025	4 Months	Life Sync — Blood Donation & Alert Platform Emergency donor matching system with geolocation filtering, automated Nodemailer notifications, and verified donor registry. Live Site Client Repo Server Repo life-sync-fab40.web.app	1, 2, 3, 4, q1	React, Node.js, Express, MongoDB, Nodemailer, JWT, REST APIs	Linux, Windows, MongoDB	Full-Stack Software Engineer	2
08/2026 – continue	Ongoing	Scholar Management System Academic institution portal managing faculty profiles, research publications, grant approvals, and student evaluations. GitHub Repo github.com/HosnainRafi/scholar-management	1, 2, 3, 4, q1	TypeScript, React, Node.js, Express, PostgreSQL, Prisma ORM	Linux, Windows, PostgreSQL	Full-Stack Software Engineer	2
08/2026 – 08/2026	1 Month	Katakana Gym — Japanese Reading Platform Confidence-first Japanese Katakana drill app with Web Audio speech pronunciation and progressive Daily Life reading library for foreigners. GitHub Repo github.com/HosnainRafi/katakana-gym	1, 2, 3, 4	TypeScript, Next.js, React, Web Audio API, Tailwind CSS	Linux, Windows	Full-Stack Software Engineer	1
01/2026 – 04/2026	4 Months	Frappe Healthcare Node Integration Middleware system integrating external patient management portals with Frappe ERP Healthcare module REST APIs. GitHub Repo github.com/HosnainRafi/frappe_healthcare_Node_js	1, 2, 3, 4, q1	JavaScript, Node.js, Frappe ERP REST API, Express, Microservices	Linux, Windows, MariaDB	Full-Stack Software Engineer	1
10/2025	1 Month	Microservice Monolith Architecture Testbed Event-driven decoupled microservice prototype exploring asynchronous message queues, inter-service gRPC/REST, and data consistency. GitHub Repo github.com/HosnainRafi/microservice-monolith	1, 2, 3, 4, q1	TypeScript, Node.js, Redis Pub/Sub, Docker, Express	Linux, Windows	Full-Stack Software Engineer	1
10/2025 – 11/2025	2 Months	Believers E-Commerce Platform Comprehensive online retail platform featuring product catalog search, shopping cart state management, and secure checkout workflows. GitHub Repo github.com/HosnainRafi/belivers-ecommerce	1, 2, 3, 4, q1	TypeScript, React, Node.js, Express, Redux Toolkit, MongoDB	Linux, Windows, MongoDB	Full-Stack Software Engineer	2

*Development Process (開発工程)	1 = Requirements (要件定義)	2 = Basic/Detail Design (設計)	3 = Implementation (実装・開発)	4 = Documentation & Ops (納品・運用)
*QA Process (品質管理工程)	q1 = Test Plan (テスト計画)	q2 = Test Design (仕様書作成)	q3 = Test Execution (テスト実施)	q4 = Automated Test (自動化テスト)

8. Duration of Total Working Experience	総業務経験年数
Total = 4+ years (4年以上の実務経験) (September 2022 – Present Mortgage Magic Ltd & Full-Stack Software Engineering)	
Self-Commitment for Japanese IT Firms (志望への取り組み・姿勢): I am committed to delivering high-reliability, clean software conforming to strict Japanese quality standards (品質第一). Dedicated to practicing Hou-Ren-So (報連相) and continuous Japanese language study (JLPT N5 target, daily practice). Eager to contribute long-term to offshore and in-house Japanese software development projects.
